(Of the Mother's lovely Love Poems.)
The mother's love is a sweetest vest,
That wraps the child in a warmest nest,
But never, never can it be forgot,
The love that's in the mother's heart.

The mother's love is a sweetest vest,
That wraps the child in a warmest nest,
But never, never can it be forgot,
The love that's in the mother's heart.

The Baby Show that Beats the Wheeling Show Last Summer.

New York Sun of Tuesday.

The Baby Show began yesterday and nearly 4000 children of all conditions in life were on exhibition.

Among the curiosities now temporarily residing in Gotham, whose appearance at the exhibition is certain, we note the following: There is one queer looking child, with a long jaw and very large ears, who "barks like a dog." It might seem sufficient to say that it barks, but as many of our readers are familiar with the bark of a dog, and also that of the hyena, we mark the distinction. It is understood that the child barks like a hyena, which calls its mother. It also barks when it is satisfied—that relieves its mother.

As a physical curiosity, traveling in nature, a pretty child, with a long neck, will be regarded with interest. Most children make their initial walk in life with a full complement of hair, toe nails and finger nails. There are now and then bald-headed babies, but such specimens to their fathers are exceptional. This little fellow had a single hair—perhaps we should say a solitary hair—not a nail to defend himself with. He is now thirteen months of age, and a very solemn person he appears to be.

A and exhibit in the little one who "most resembles a monkey." Fortunately, his father does not attend the show, but his devoted mother is as proud of her son's Darwinian peculiarity as if he resembled Napoleon the Great. It is understood that this baby boy indicates his familiarity with the apian way by continually holding his head up, as if he would probably have the medal, as all monkeys are middlemen.

One of the curious freaks of nature is the jaw-tooth baby, the most extraordinary specimen within a radius of 200 miles of the City Hall. Jaw teeth at four months of age is a rare thing. This extraordinary child would in four months 25 times a minute with a truly accommodating spirit, and biting visitors' forefingers with an easy grace that won for it the respect of all who beheld.

Closely following the back-tooth baby is a baby who cackles like a setting hen, and a bald-headed baby who knows the alphabet.

Mr. Barnum found that fecundity was the big thing in his collection. Great crowds continually gathered about the twins, policemen were called to protect the triplets, and a special platform was assigned the quartet. It will please our lady readers to know that there are more triplets than ever before shown, and a huge side set of quartets are hoped for, but not yet seen. In the old-time visitors looked at the triplets with interest, at the mother with curiosity, and at the father with awe. Thus far only one triplet has come forth like a man and promised to form one of the family group. Others may be tempted by the prizes. Naturally there are more twins than triplets, and it is pleasant to record their exhibitionary world.

One of the most interesting of the exhibition is a baby who is said to be a twin set so thin that they wear padding over, or rather under their bones. They look puny. If the two were rolled into one he would not equal an average child of feeble constitution. If the two twins have a prime it ought to be in the shape of osteo-meat stuffing.

Nothing is more contagious than a laugh. Charley Backus, the colored man's friend, used to sing a laughing song, which had a laughing effect. He laughed, the quartet laughed, the mother laughed, and the father laughed. Apropos of this there is a laughing baby whose mother rarely smiles. The father smiles whenever he is asked. The baby laughs a regular ha ha, and seems to like it. He used to make his mother cry, and his father laugh, but she is a susceptible young person, laughed so much that she injured her health, and was compelled to seek another situation.

In one of the most beautiful vases in Greenwood Cemetery, on the top of an old gentleman's tomb, is a figure of a woman who weeps, and a figure of a man who stands, and a figure of a child who is a laughing baby.

Just such a mammoth, monumental and extraordinary child as this in size and "general cut" will be carted to the exhibition floor to-day. No such gloomy lines as those above will adorn the exhibition floor, but the child is as fat and as expressive as that of the stone cherub described. That the great fat baby will challenge the admiration of all visitors is unquestionable, and his parents should hire a policeman to guard his back, his hair, which is golden-bred, and his hands in golden gloves.

The entire number nearly four hundred.
